

TA55

Large Motorized Tilt Mount

Our 1.0" thin motorized tilt mount is perfect for today's slim LCD and LED TVs, providing enhanced viewing as it reduces glare and reflections. TA55 tilts your TV down at the touch of a button and returns to an aesthetically pleasing upright flush position when not in use. With the included learnable IR receiver, you can program any universal remote control to adjust the tilt position. TA55 is the Industry's thinnest motorized tilt mount that offers user-friendly design, and a simple installation process. With the optional ControlWand (Wi-Fi adapter) a hand held device (iPhone, iPod) can be used to control the mount via auto, manual, and gyro modes. In the gyro mode, the motion of the mount is synchronized with the motion of the hand held device without having to push a button.
