

## ZA52 Motorized Swivel Stand

Our ZA52 motorized swivel table stand is a unique alternative to placing a flat panel TV on a table. Whether you need to rotate the TV to eliminate glare or just want to be able to see the TV from another seating position in the room, you can do all this at the touch of a button. Its sturdy design offers 60° of swivel motion left or right, eliminating flat-panel viewing problems such as glare and reflections, including inaccurate color and loss of picture detail. ZA52 has a built-in learnable IR receiver to learn the signals from your own remote control to adjust your TV, so you can fine-tune your viewing experience every time.
